

Pyroelectric Infrared Detectors

Dual Element Detector LHi 778

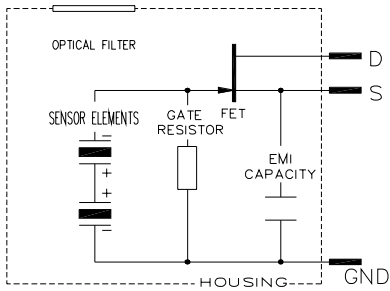

TO-5 housing

Competitive cost version

Designed for motion control

The **LHi 778** pyroelectric infrared-detector series are the standard dual element design recommended for all variants of motion control. They include a dual element pyro-electric ceramic element with Fet in source follower connection.

LHi 778 detector is available in **TO-5** housing with standard infrared filter. It provides high responsivity with excellent common mode performance (match) and low noise at steady state and temperature changes.
